

Ogden-Hinckley Airport
Ogden, Utah

CSA's International Training Center at the Ogden airport will offer the best in all training scenarios. A fully operational control tower complete with IFR approaches to the various runways enhances the learning experience in the local environment. Students will acquire approximately 250 hours of flight time with CSA.

Housing for international students is in close proximity to the airport. Transportation will be provided.

CSA is open daily for flight and ground training. Professional instructors and staff members are always on hand for assistance.

2008 Tecnam P92 Eaglet

Tecnam designed the P92 Eaglet after re-examining the light aircraft market and determining a significant need existed for a robust trainer for all levels of flight – Sport Pilot through Commercial training. The result is the Eaglet. Born on a little field in Capua, Italy the Eaglet meets this need.

Victor Ngai, former student and flight instructor at CSA
